

Alex Tanous has:

1 set as major title

Predicted many events before they happened

some of them international in scope. . .

. . .such as wars, assassination attempts. . .

some of them private, even trivial. . .

. . .such as the outcome of baseball games, the sex and date-of-birth of unborn children. . .

Performed unexplained physical feats

. . .stopping watches, breaking cameras, turning off the electric lights in a room without touching the switch, projecting visible images from his eyes, creating photographic balls of light in totally dark rooms. . .

"Left his body," under rigorous scientific controls, "projected himself" to another room, moved an object in that room, and returned. . .

As a national celebrity, Dr. Tanous has made hundreds of predictions, both personal and private, on the radio and television, as well as in the newspapers -- all documented and corroborated, and in this book he tells how it all came about -- and how you might learn to duplicate some of his extraordinary feats.

BEYOND COINCIDENCE: One Man's Experiences with Psychic Phenomena

by Alex Tanous with Harvey Ardman

I have broken cameras of all descriptions -- still cameras, movie cameras, TV cameras -- without touching them.

I have stopped watches, tape recorders and many other kinds of equipment.

I have been the subject of strange photographs, in which things appear that were not visible to the naked eye, or in which things disappear that were visible.

I have caused electric lights to go out in rooms, buildings, even an entire town -- simply by willing them out.

I have caused objects to move without touching them.

I have projected images onto walls using nothing more than my eyes.

I have created floating balls of light in totally dark rooms.

I have appeared in front of witnesses in two different places in exactly the same moment.

I have separated one part of my consciousness from the rest, sent it hundreds of miles from my physical body, observed the surroundings, then returned and reported what I saw with total accuracy. And I have duplicated this feat time and time again, in a scientific laboratory, under tightly controlled conditions.

I have left my body, gone into another room, moved an object, then returned -- also under carefully controlled conditions. Further, I have been detected by scientific instruments in one room while my physical body was in another.

I have spoken -- even battled -- with spirits or ghosts and "depsyched" houses occupied by poltergeists.

I have several times made contact with an energy I believe is not from this world.

In most cases, I have precise, documented proof of these acts -- tape recordings, affidavits signed by impartial witnesses, scientific evidence. I intend to present all of this in detail in this book.

~~Over the years, I've had not only an extraordinary number of psychic experiences, but also an extraordinary variety. For example:~~

I have known in advance on many occasions that a person was going to die.

I have traveled backward in time to view past events while they were happening, then returned to tell about them in incredible detail, detail only an actual observer could have known.

I have predicted the ^Coccurrence (and often the exact date) of many significant events, including wars, explosions, the deaths of important persons, assassination attempts and the like.

I have foretold with precision the results of elections, horse races, baseball games and political negotiations.

I have revealed to private individuals many events in their futures, such as marriages, the date-of-birth, weight and even hair color of unborn children, business failures or successes, the fate of friends or relatives in danger (in combat in Vietnam, for instance).

I have re-lived crimes in such detail that I've been able to sketch the faces of the culprits -- persons later arrested and convicted for the crime. I've helped police locate many missing or kidnapped people, especially children.

I have diagnosed illness before it was detected by doctors.

I have located lost objects, including everything from stolen sports cars to misfiled receipts.

I have touched objects and from that alone known many things about their owners.

I have relayed important information from departed persons to the living.

Most of these psychic feats involve knowledge of some sort, knowledge I couldn't have gotten in the ordinary way. This is usually described by terms such as clairvoyance, telepathy, precognition or ESP. But some of the things I've done go far beyond this.
